

## Improve your Patient Checkin Process.

One Healthcare Solution™ is excited to introduce

### *Electronic Patient Checkin*

Auto e-mail your patients medical history forms, privacy policy statement, appointment reminders and have your EMR system updated.

New and existing patients complete your forms. It's like having them fill out paper forms in your office, but in the privacy of their own home. Resulting in more accurate and legible information. You automatically receive the completed forms with updates ready for you to review.

Demographic Information	Chart Data	Paperwork
Patient	Family History	Privacy Policy Statement
Guarantor	Social History	Clinic Directions
Insurance	Medical History	Appointment Information
Employer	Allergies	
	Previous Surgeries	
	Current Medications	
	ROS	

Receiving completed forms prior to the patient's visit enables you to review the information and check for mistakes that may hamper reimbursements. It also allows you to carefully preview medical history for items of concern or special attention. There's no doubt that catching a single mistake, accidental or otherwise, can amount to substantial savings.

# Automated e-Patient Checkin

- Increase patient satisfaction by having paperwork filled out at their convenience.
- Lets patients participate in their health record.
- Have patients fill out insurance information for office to verify before setting appointment.
- Cuts out redundant repetition of re-entering patient information by staff and physicians.
- Creates chart full of rich, accurate information that is pertinent to the visit and filled out by the patient.
- Helps produce quality documentation that is specific to that patient.
- View what the patient filled out.
- Eliminate the majority of dictation by having the patient fill out their own e-health history.

## ***One Healthcare Solution™ introduces a new way for physician's offices to communicate with patients.***

Sending an e-mail is one of the quickest and easiest ways to communicate. Electronic Patient Checkin gives physicians and staff the ability to directly communicate with new and existing patients by simply sending an e-mail. A major time saver and eliminates phone calls. Physicians are able to quickly produce highly accurate and legible chart notes, medical correspondence and other business documents. Electronic Patient Checkin gives patients the means to help you and your staff improve documentation, saves everyone time and improves practice performance.
